JOSHUA ANSAH

FULL-STACK ENGINEER

mr.joshua.ansah@gmail.com | +233 53 967 2914 | Accra, Ghana | Portfolio | LinkedIn

SUMMARY

Full-Stack Engineer with 4+ years of experience building fintech, SaaS, and mobile products. Skilled in TypeScript, React, Next.js, and Node.js. Experienced in delivering features from implementation through release, improving reliability, and automating workflows.

WORK EXPERIENCE

FREELANCE SOFTWARE ENGINEER (Contract) *Accra, Ghana* | Aug 2026 – Present
Chale Lets Links Up
- Built and launched responsive production websites for Chale Link Up and Bomuara using React.
- Developed Bomuara's cross-platform iOS and Android application using React Native and Expo
- Implemented authentication, messaging, payment, notification, and analytics flows in the mobile apps.

FULL-STACK ENGINEER *Accra, Ghana* | Oct 2024 – Jul 2026
Fluid Finance Technologies
- Engineered and launched 5+ critical features for customer-facing fintech web apps using Flutter, React, TypeScript, Node.js, and PostgreSQL.
- Reduced production incidents by 30% by introducing a data sanitation strategy and resolving 50+ critical bugs.
- Designed and implemented an internal admin dashboard automating major manual workflows, saving the team 10+ hours per month.
- Improved the GitHub Actions CI/CD pipeline, reducing failed deployments and speeding up releases.
- Collaborated with product managers and designers in Agile sprints to translate requirements into features, participate in code reviews, and deliver work through Git-based workflows.
- Utilized AI-assisted development tools as part of the daily workflow, while enforcing code review and team standards.

LEAD SOFTWARE ENGINEER (Contract) *Accra, Ghana* | Mar 2025 – Sep 2025
Verified Global E - Transport
- Led a three-member engineering team delivering logistics and transport management solutions, using Flutter, React, Node.js/Express.js, TypeScript, and PostgreSQL.
- Designed backend services for bookings, routing, and user management using Node.js, Express, TypeScript, and PostgreSQL.
- Introduced Agile practices and managed sprint planning in Notion, improving the team's sprint completion rate by 25% and increasing delivery predictability for stakeholders.
- Established new coding standards and a mandatory code review process that decreased the bug rate in new features by 40% in the first three months.

SOFTWARE DEVELOPER *Accra, Ghana* | Mar 2023 – Sep 2024
Seymo
- Built attendance, fee tracking, and push notification modules for Seymo School, a product used by 1,000+ users.
- Owned the development of key mobile features in Flutter, delivering a consistent and performant experience for users on both Android and iOS.
- Partnered with the design team to build a shared component library that unified our UI and sped up our development cycle, allowing us to ship new features ~20% faster.

FULL-STACK DEVELOPER *Accra, Ghana* | Feb 2023 – Sep 2024
Freelance (concurrent)
- Partnered directly with clients to build and launch custom web applications, handling the full lifecycle from initial design to deployment and maintenance.
- Launched the Green Ghana mobile app on both iOS and Android, collaborating with another developer to deliver a user-friendly Flutter application for a key government initiative.
- Developed the Moyosore blogging and audio platform, implementing the Sanity CMS backend that cut the client's content publishing time by half.

FRONT END DEVELOPER *Accra, Ghana* | Sep 2022 – Nov 2022
Spayces
- Brought a key product feature to life by building its entire front-end, delivering a responsive and pixel-perfect UI in React.js for a critical release.

- Partnered with backend engineers to seamlessly integrate REST APIs, ensuring the new feature had smooth data flow and robust error handling for a stable user experience.

FLUTTER DEVELOPER *Accra, Ghana* | Sep 2021 – Aug 2022
Ghana Tech Lab
- Played a key role in developing 'The Mechanic,' a service marketplace app, where I built the end-to-end user booking and service feedback features in Flutter.
- Worked closely with designers to transform Figma mockups into interactive Flutter prototypes, allowing our team to rapidly validate new concepts with stakeholders.
- Gained strong foundational web skills by helping build and ship several full-stack projects using HTML, CSS, JavaScript, and collaborative Git workflows.

EDUCATION

Bachelor's Degree in Computer Engineering *Ternopil, Ukraine* | Oct 2017 – Jun 2021
Ternopil Ivan Pul'uj National Technical University

SKILLS

- **Languages:** Dart, JavaScript, TypeScript
- **Frontend Frameworks:** Bootstrap, Material UI, Next.js, React.js, Tailwind CSS
- **Backend Frameworks and Libraries:** Express.js, Nest.js, Node.js
- **Mobile Framework/SDK:** Flutter, React Native, Expo
- **Databases:** Firebase, MongoDB, PostgreSQL
- **Tools & Platforms:** CI/CD, Docker, Figma, Git, GitHub, Notion, Redux
- **AI & Developer Tools:** Cursor, Codex, LLM-assisted development for feature prototyping and refactoring
- **Methodologies:** Agile, Project Management, SDLC
- **Soft Skills:** Collaboration, Communication, Problem Solving, Teamwork

PROJECTS

CediWise Feb 2026 – Present
React Native, Expo, Supabase
Smart budgeting tracking and financial literacy mobile app for Ghanaian users. Features income/expense tracking, savings goals, and financial tips. Cross-platform (Android & iOS).

Ghana API Aug 2025 – Present
Nest.js, PostgreSQL, Swagger
Open-source REST API providing structured access to Ghanaian public datasets.

Seymo School Nov 2023 – Aug 2024
Flutter
School management product built at Seymo. Contributed to attendance, fee tracking, and notification features used by 1,000+ users.

Moyosore Blogs
Next.js, Sanity, Tailwind
A web app where users can read blog posts, listen to audio recordings.

Shine Energy
Next.js, Tailwind
Official Website for Shine Energy Company Limited
